

GRENADA

bean, bush

Grenada is a true 2 sieve size with pods that are 6.5 inches long. The seed development is slow and has a long shelf life. Great variety for customers looking for long, thin podded green beans with a great disease package. A highlight of the disease package is a high tolerance to bacterial brown spot. Grenada is suited for both fresh pack and fresh market growers.

FEATURES

- Disease resistance to BCMV, Brown Spot, Halo Blight, Rust, and Anthracnose

CULTURAL SHEET

Properties

Variety number/name	Grenada
Species	Phaseolus vulgaris
Common name	Bean
Family	Legume
Type	Annual
Days to Maturity	58
Pod Length Inches)	6.5"
Pod Color	Dark (D)
Percent 1-3 Sieve	100
Percent 4 Sieve	0
Percent 5 Sieve	0
