

BLUE LAKE SUPERIOR

bean, blue-lake bush

Blue Lake Superior is our newest Blue Lake type bean. This bean brings all the flavor that a blue lake is known for but with improved characteristics. It has a better upright plant architecture with less floppy tendencies, a disease package, and uniform pods. Low pod fiber also means this is an excellent variety for home canning, pickling, or freezing. Overall: higher yield, improved plant architecture, refined pod. Excellent variety for the home garden market or anyone looking for an improved Blue Lake type.

FEATURES

- Great disease package
- Upright plant structure

CULTURAL SHEET

Properties

Variety number/name	Blue Lake Superior
